Subject: Letter of Recognition

It is my pleasure to share my positive experience of working with Tower Elevator Systems from the custom design phase through construction, installation, commissioning and jurisdictional approval at our Richmond, Virginia industrial facility. Your Team's execution of the custom elevator to install into an existing 60 foot under-ground access shaft was near flawless.

Kudos and handshakes do not cover all of the thoughtful engineering details and design considerations that went into this system. The on-site installation crew was well prepared and equipped, detail oriented and demonstrated that safety was paramount. Mechanical, electrical and software system commissioning was well handled by the on-site crews. Maintenance and operational manual documentation was excellent.

Please feel free to contact me should you wish to offer a tour of the completed installation to any of your future perspective clients.

Respectfully,

A handwritten signature in black ink that reads "Marc D. Wolitz". The signature is fluid and cursive, with a long horizontal stroke extending to the right.

Marc D. Wolitz, P.E.
